

# Organisational change PMC Cylinders

**Torbjörn Lantz new PRESIDENT at PMC Cylinders with the start of the May 13, 2019.**

Torbjörn comes most recently from Tranter International AB where he was CEO for 10 years. He is a civil engineer from KTH and worked in international environment for a long time. He has developed Tranter's expertise in the service and spare parts and its sales processes. The factory in Vänersborg has developed high expertise in Lean and especially 5S and standardised way of working during Torbjörns management.

*"Thanks to the long history of quality and customer focus that PMC Cylinders has. I very much look forward to be able to participate in the future development. PMC Cylinders is active in an exiting market that constantly develops"*

Håkan Säberg leaving the PMC Cylinders after 12 years as CEO. During Håkans management, the company has made several large and important changes. Among other things, the business has been streamlined to be clearer and today one of the world's leading manufacturer in hydraulic cylinders for mobile applications such as; forklift trucks, reach stackers, mobile cranes, arial platforms and agricultur equipment.

At the same time we wish Håkan the best of luck, we welcome Torbjörn to his new position!
